BACKGROUND INFORMATION:

About the ACP

The **African, Caribbean and Pacific Group of States** (ACP) is an organisation created by the Georgetown Agreement in 1975. All 79 African, Caribbean and Pacific Member States, except Cuba, are signatories to the Cotonou Agreement, also known as the “ACP-EC Partnership Agreement”, which binds them to the European Union. Of the 79 states, 48 are from sub-Saharan Africa, 16 from the Caribbean, and 15 from the Pacific.

The ACP Group’s main objectives are:

- Sustainable development of its Member-States and their gradual integration into the global economy, being poverty reduction a priority. This requires a new, fairer, and more equitable world order;
- Coordination of ACP Group activities to facilitate ACP-EC Partnership Agreements;
- Consolidation of unity and solidarity among ACP States, as well as mutual understanding between their peoples;
- Establishment and consolidation of peace and stability in a free and democratic society.

About the GCCA+ initiative

The **Global Climate Change Alliance Plus** (GCCA+) is a European Union flagship initiative, which helps the world’s most vulnerable countries to address climate change. Having started with just four pilot projects in 2008, it has become a major climate initiative funding over 70 projects of national, regional, and global scope in Africa, Asia, the Caribbean and the Pacific. This EU initiative helps mainly Small Islands Developing States (SIDS) and Least Developed Countries (LDCs) increase their resilience to climate change.

The GCCA+ also supports these group of countries to implement commitments from the 2015 Paris Agreement on Climate Change (COP21). This is in line with the *2030 Agenda for Sustainable Development* and the new *European Consensus on Development*.

About the Intra-ACP GCCA+ Programme

It is an **Intra-ACP Group of States Programme** that supports ACP countries’ efforts to address climate change, helping them to better tackle climate change as a challenge to their development. It is funded by the 11th European Development Fund (EDF), in the context of the wider Global Climate Change Alliance+ (GCCA+) flagship programme and it is managed by the ACP Secretariat in Brussels.

The Programme’s **overall objective** is to increase the resilience of ACP regions and countries to climate change and achieve the UN’s Sustainable Development Goals (SDGs), in particular the Goal 13 “Take urgent action to combat climate change and its impacts”, in order to alleviate poverty and promote sustainable development. Its **specific objective** is to strengthen the capacities of ACP regions and countries to undertake regional and national adaptation and mitigation actions in response to the challenges caused by the impacts of climate change.
